SOVIT THAKRE

Bengaluru, India | +91 9571026481 | sovitthakre1313@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst and MCA (Data Science, 2026) graduate with hands-on experience building Python data workflows, validation checks, and generative AI solutions using LangChain, RAG, and LLM APIs. At SolarSquare Energy, automated recurring reporting and reduced reporting errors by 30% through end-to-end data validation, and scoped a GCP-based pre-sales dashboard with chatbot capability. Built and deployed RAG, contextual chatbot, and MLOps projects with FastAPI and Docker, and communicate findings clearly to non-technical stakeholders.

TECHNICAL SKILLS

Python & Data: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, BigQuery, MySQL, PostgreSQL, MongoDB, Advanced Excel, Data Cleaning, EDA

Generative AI & LLMs: LLM Fundamentals (Tokenization, Context Windows, Prompt Design), LangChain (Chains, Agents, Retrieval), RAG, OpenAI API, Embeddings, FAISS, pgvector, Vector Databases

Pipelines & Deployment: ETL, Data Validation & Quality Checks, Reusable Python Modules, FastAPI, REST APIs, Docker, Google Cloud Run, Git, MLOps & Model Versioning

ML & Analytics: TensorFlow, PyTorch, Scikit-Learn, Trend Analysis, Predictive Modeling, Model Evaluation, Documentation

BI & Storytelling: Power BI (DAX, Power Query), Looker Studio, Tableau, Dashboards, Data Storytelling, Stakeholder Reporting

Currently Building: LangGraph (Graph-Based Workflows), Model Context Protocol (MCP), LLM Evaluation, Responsible AI & Governance

EXPERIENCE

SolarSquare Energy Pvt. Ltd. – Data Analyst & Outreach Intern Nagpur, India | Feb 2026 – Aug 2026

- Collected, cleaned, and structured operational data using Python and SQL to deliver accurate recurring reports for business decision makers.
- Automated recurring reporting workflows and reduced reporting errors by 30% through end-to-end data validation and reconciliation checks.
- Scoped and authored a feasibility report for a pre-sales dashboard with chatbot capability on GCP (BigQuery, Looker, Conversational Analytics API, Docker, Cloud Run) for natural-language data querying.
- Partnered with outreach and operations teams to define reporting requirements and present insights in clear, non-technical narratives.

Skillfied Mentor – Machine Learning Intern Jan 2026 – Mar 2026

- Built and evaluated machine learning models with TensorFlow, PyTorch, Scikit-Learn, and Pandas, covering data preparation, EDA, training, and model evaluation.

PROJECTS

AI Document Q&A System (RAG) *(Python, LangChain, OpenAI API, FAISS)*

LLM workflow for question answering and knowledge extraction over unstructured documents using chunking, embeddings, and retrieval-grounded answers.

Contextual Support Chatbot *(Python, LLM APIs, FastAPI)*

Chatbot with persistent contextual memory that manages conversation context across turns and exposes LLM responses through a REST API.

MLOps Pipeline for House Price Prediction *(Python, FastAPI, Docker)*

Reusable pipeline with model versioning and validation, deployed as a containerized REST API.

Customer Churn Analysis System *(Python, SQL, Power BI)*

Analyzed customer data to identify churn drivers and trends, delivering dashboards and actionable retention recommendations.

E-Commerce Sales Analytics Dashboard *(BigQuery, Looker Studio)*

Cloud-based dashboard tracking sales trends and performance KPIs for business stakeholders.

EDUCATION

Master of Computer Applications (Data Science) **2024 – 2026**
Alliance University, Bengaluru, India CGPA: 8.5

Bachelor of Commerce (Computer Application) **2021 – 2024**
Tirpude Institute of Management Education, Nagpur, India CGPA: 7.1

CERTIFICATIONS

- Introduction to Software Engineering — IBM
- Google Data Analytics (Google)
- Databases (Meta)
- Machine Learning: Classification (University of Washington)
- Neural Networks and Deep Learning from Deeplearning.AI
